

JUMBO-MULE DOLLY

Product Description

This four-wheeled flatbed dolly weighs only 6 lbs. but has a weight capacity of 350 lbs.! With slightly larger dimensions than the mini-mule, the jumbo-mule is ideal for transporting bottled beverage cases. It is constructed of robust glass-filled nylon with reinforced ribs for increased structural strength and impact rigidity. Rubber grips help prevent the load from shifting during transport. Heavy duty full-rotation castors enable large movable displays and unique in-store layouts.

One and two-piece handle sets are also available to effortlessly transport dollies throughout a beverage cooler or retail store. Solid steel J-hooks easily connect to other ADCO dollies in this line to provide a complete, portable storage system with multiple configurations. ADCO jumbo-mules offer easy mobility and quick access to product inventory, improving in-store efficiency and reducing injuries related to heavy lifting.

Price is for each unit.
