

NON-RETURN VALVE

Product Description

Non-return valves, also known as Check Valve, or One-Way Valves are specially designed to allow air flow in one direction and prevent air flow coming from the opposite direction.

The non-return valves come in two different models - In-line Non-Return Valve and M16 Thread Non-Return Valve.

Key features

- Fully automatic
- Optional valve operated indicator
- Wide operating temperature range
- Two way valves for pressure and vacuum relief
- Fully automatic opening and closing
- Manual override facility for equalisation
- Protection against waterspray (optional)
- Flow rates range from cc/min to litres/h
- Low cohesion providing reliable opening
- Available in aluminum, brass, stainless steel and plastic

Technical Specificatoin

- Operating temperature: -30oC to +90oC
- Pressure or vacuum opening: minimum 250N/m² (1inch W G)
- Pressure opening: maximum 206 KN/m² (30 PSI)
- Vacuum opening: maximum -68.9 KN/m² (-10 PSI)
- Opening tolerance: ±5%
- Stability: ±10%
