

POWERGLIDE SHELF

Product Description

The retail PowerGlide shelf instantly adjusts to any size beverage, from the smallest energy drink to the largest gallon size, without the need for any kind of tools! Quality glider construction compensates for the uneven wire shelving – adjusting to any level surface. Adding and deleting row separators takes just seconds!

The never-fail roller system, reinforced solid surface and sanitation strip ensures all drips flow to the front for a quick and easy clean-up (no "drip downs").

Front- and back-numbered guides allow an easy reset of dividers from any angle. Convenient loading dock expedites the product restocking process.

Ultra clear beverage stops at front, ensuring it does not impede product labeling. The PowerGuide shelf enables one person to make instant product resets to fit any convenient store needs!
