

AIRPOUCH® FASTWRAP™ SYSTEM

Product Description

The AirPouch® FastWrap™ – A higher standard of excellence in protective packaging on-demand.

The AirPouch® FastWrap™ is the industry's most flexible, reliable and user-friendly on-demand protective packaging system. The FastWrap system produces filled bubbles and tubes used for wrapping, interleaving and block-and-brace applications. FastWrap secures and cushions your products while in transit, reducing returns and increasing customer satisfaction.

Compact and convenient, the all-electric design and small footprint of the AirPouch FastWrap is ideal as a stand-alone system or combined with a variety of equipment accessories for any size pack station.

The FastWrap system features state-of-the-art technology that ensures reliability and quality. Plus, the AirPouch FastWrap on-demand protective packaging system features a knifeless design – eliminating the primary wear item found on other machines in its class.

AirPouch FastWrap cushioning bubbles feature our patented, channel-filled honeycomb design, which allows multi-direction wrapping and improved product protection. FastWrap block-and-brace tubes feature our patented EZ-Tear™ Perforations between each tube, making them easier to separate and reducing material waste. Both products are available in a variety of system-matched film types, including EarthAware® Biodegradable* and Recycled Films. The convenient, boxed material is easy to handle, and dramatically reduces the storage requirements found with paper, foam and pre-filled bundle bubble materials.

Key Features

- One system produces bubbles and tubes on-demand for wrapping, interleaving and block-and-brace applications
- Tabletop, all-electric system operates at 65 feet per minute, and does not require compressed air to operate
- Better air retention and improved yield reduce cost per cubic foot
- Reliable equipment designed for easy maintenance and serviceability
- High-yield, boxed material reduces storage and transport requirements of paper, foam and pre-filled bubble materials
- Operator friendly controls are regulated through intelligent design, managing heat, air and speed for consistent fill level and seal quality
- Inflates and seals the protective wrap and tube material from start to stop, eliminating waste
- Monitor usage and conduct diagnostics through an onboard connectivity port

Optional Additions

- Machine Stand
- Storage Hoppers
- Automatic Winder
- Footswitch
- Custom engineered solutions for unique packing station requirements

Product Specifications

Technical Specifications	
Weight:	38 lbs
Electrical:	110V to 240V VAC; 50/60 Hz; 7/3.5 FLA
Material Sizes:	12", 24" Wrap (inflated) and 14" Tube (inflated)
